[CD Review: Destroy All Monsters – Live In Tokyo And Osaka](#)

Much of the latter part of the 20th century was spent obsessing about UFO's. I believe it all started in the late 40's with the supposed crash landing of one of these strange craft, and it's subsequent stashing at 'Area 51' in Nevada. I love a good conspiracy, JFK, UFO's, Elvis sightings, I love them all!

I can pretty much guarantee that if you were to slip this CD into the SETI main computer, SETI would claim they had found alien life. As opposed to me, I just thought that track one was a boring adventure into 'white noise'. I am sure that there was a point to it, but try as I might I could not find it.

My wife was giving me the evil look by the end of track two, that special look, the one that says "If you don't turn this off now, I am going to divorce you" look.

Well I don't scare easily, so I plowed on.....

I found most of the rest of the album to be somewhat thin. But what do I know? Maybe many other folks would rave about them. A quick 'Google' of the band revealed a music genre I had not come across before, but one that is strangely fitting, 'Noise Rock'. That sums them up rather well.
