

Famous Underground have dropped their self-titled album *Famous Underground* on us. This bunch make a racket that sounds like it is speaking to you from the late '80s. This is Gun N' Roses mixed with a touch of L.A. Guns and Dangerous Toys. The opening track "Wasteland" is their "Welcome to the Jungle" and it works just as well. Rather than just mimic the gritty sleaze rock of the day, this lot have managed to put their own tag on the music. "Forever and a Day" is a ballad in which they manage not to sound twee. It never sounds derivative at all, yet at the same time it sounds and feels familiar. This is not a hard [band](#) to get into at all. If you are into sleaze rock this one will grab you right away. - Marty Dodge
