

FAMOUS UNDERGROUND

s/t

Initially I had no hopes for this band based on their name...I hear so many generic metal bands that all blend together and the bands name fits that mold rather well...shockingly though the band was good, the music is modern sounding metal with old school values, the guitars sound heavy & strong, the vocals are good & the band overall rocks hard!

SONIARAO

"Los Angeles Pt. 1"

This 5 song EP is short but sweet...it's musically on the same level as Christina Perri with every song being a heartfelt love letter to some forgot moment in time....I dug this record simply because the music & the vocals fit perfectly & it's a mellow listen filled with emotion & melody.

CASEY BLACK

"Lay You In The Loam"

Solid singer, solid song writing yet just a little brooding at times...this record reminds me of the mellower material Bruce Springsteen released later in his career...all in all a good record.
