

Rock N Roll Experience - March/April 2006

ACCEPT

Metal Blast from the Past dvd

Track Listing:

Rating: 5 Stars!

"Midnight Mover" is the Accept video that moves so fast that it might make you throw up..."Balls to the Wall" is the biggest hit by Accept, "Generation Clash" was the first video the band made without Udo singing...all of that & so much more is here on the new Accept dvd. This DVD is done in documentary style, but rather than just showing fast clips, this dvd shows full length clips of concert footage & music videos! The funniest moment on the dvd for me, was seeing really old footage of Udo in the 70's with shoulder length hair & a red shirt..I'd never seen Udo with long hair & he usually weard camouflage, so it was funny to see a younger Udo. The highlight of this dvd is that it's a dual disc & one side is an audio CD that has tons of un-released demos...these demo tracks are great for the Accept fan who has all of the bands cd's, & the Discography on the dvd is good too..it has atleast 2 or more listenable songs from each Accept CD! I always felt that Accept, Judas Priest & Iron Maiden were the best non-American Metal bands from the late 70's/early 80's & it's good to finally have an Accept DVD that tells the entire Accept story! If you'd like to get a copy, you can get it online at www.musicvideodistributors.com
