BEHEMOTH/Live Eschaton/The Art Of Rebellion DVD/CD (Metal Mind Productions)

This is a crushing black metal band and this is one wicked cd/dvd that any underground fan would want. The DVD contains 10 songs and the band just tears

through each track with such feeling and passion it isn't funny. Excellent camera work as well from the bands show way back in 2000. There is also a CD enclosed (which at least my version contained) which has 6 rare tracks and an interview with the band and a couple band videos. This is one awesome package that

Metal Mind has put together and you can get it from them at:
