DVD: NASHVILLE PUSSY *Keep On Fuckin' In Paris*

You know, there's not many bands these days who rock as solid as Georgia's **Nashville Pussy** and on this DVD release, you get to see them rocking major hard in front of a packed Paris crowd. Although the physical performance is brilliant on this DVD, the actual musical performance lacks in some areas (seems the band doesn't know where they're going in between a few songs and there's a bit too much talking amongst themselves and piddling around on their instruments), but overall, you're getting a pretty realistic look at a band that's hell-bent on bringing that good ol' four-on-the-floor rock to your living room. All the great N.P. tunes are present, and the hot female guitarist and bassist are more than enough reason to purchase this offering, but then again, I'm a sleezebag! There aren't really any bonus features that attracted me to this, however I'm sure the special N.P. Karaoke Sing-A-Long feature may prove to be fun on a drunken night of viewing. Overall this is a very admirable effort from a band who really deserve your attention, so consider the retail price of \$19.95 a total bargain! Highly Recommended!!!
