## Nashville Pussy – “Keep On F\*cking in Paris” DVD

Yep, it's NP caught in front of an appreciative French audience of Parisians (who says the French don't appreciate American culture?). Though at this point I can pretty much take or leave their studio recordings, I have to admit that based on this they're pretty kick-ass live. Concert footage is of good quality, with multiple angles, good sound quality, etc. They even throw in covers by AC/DC and Turbofuckingnegro for good measure as well. Despite a lack of gal-on-gal kissing or fire-blowing, I daresay this is recommended. *David*
