

The Residents - Icky Flix (MVD)

Welcome to the dungeon of the eternally obtuse. The Residents are infamous for their bizarre live shows and boundary-pushing music. This DVD collects a good portion of their video output and it's a pretty wild ride! If you are easily disturbed, do not buy this DVD, as it will mess up your mind.

I remember seeing the video for "Hello Skinny" once on cable ages ago and it creeped me out. Years later, on this DVD collection of videos, it still does. "The Third Reich 'N' Roll," "Where Is She?," and the frightening "Songs For Swinging Larvae" are all here as well as a 17:38 min distillation of the "Vileness Fats" movie that hurt my brain. The Residents recorded new music for every track on here & the menu gives you the choice of the new music, or the original versions. A truly amazing DVD that you need to own.
