## MUSIC VIDEO DISTRIBUTORS BUSY AS BEAVERS!

The good folks at MVD, [Music Video Distributors](#) have been busy as beavers lately lining up quality DVDs for your viewing and listening pleasure. In September the company will be releasing *Where Is The Chesterfield King?!?!*, starring [the Chesterfield Kings](#) in a sci-fi mystery musical...well, we'll just let them describe it: "*Where Is The*

*Chesterfield King?!?!* is a film in the style of Ed Wood meets *Hard Days Night*. The Chesterfield Kings take on the evil Andro, a maniacal alien bent on world domination, who has kidnapped drummer Mike. Can the Chesterfield Kings find their drummer, halt Andro's master plan, & save the world? This wacky sci-fi music comedy is a must for any Chesterfield Kings fan, or anyone who enjoys seeing rock legends battle absurd aliens." Sounds pretty cool to me, especially since the flick includes bonus live footage of one of our best garage rock bands ever and carries an

affordable \$14.95 price tag! The Chesterfield Kings, for those of you not "in the know," released its first collection of R&B tinged garage rock rave-ups back in '83 and have continued to carry the torch for authentic, no-frills rock & roll ever since.

That's not all that MVD is up to these days, though. Digging into the vaults, they've come up with *Thunders, Kane & Nolan - You Can't Put Your Arms Around A Memory*. The 90 minute music DVD captures a January 1987 live performance by Johnny Thunders, Arthur "Killer" Kane and Jerry Nolan at the Roxy in LA and features a number of classic N.Y. Dolls tunes, including "Personality Crisis" and "Lonely Planet Boy" as well as inspired covers like "Eve Of Destruction" and "Little Queenie." Sadly, only Kane lived long enough to enjoy a full-fledged N.Y. Dolls reunion, and he died shortly thereafter. An important slice of rock & roll history, this disc should be on the shelf of any self-respecting New York Dolls or Johnny Thunders fan! The Chesterfield Kings DVD is due in September from MVD, the Thunders, Kane & Nolan disc is scheduled for October release.
