

Andrew W.K.-"Who Knows? Live 2000-2004" (MVD)

When I started doing DVD reviews I started to see how most music DVD's are all in the same, in-which they pretty much are simple and have the same idea behind it. Andrew W.K.'s "Who Knows", is way above and beyond that. This is a must have for music collectors and fans of great music and a way to experience what Andrew W.K. has created both in his music and live on stage. This is 75 blistering minutes of party music and what it's like to be Andrew W.K. All of his hits and misses are shown in live format. You get a 8 page booklet along with one hell of a sound. Most DVDs that feature a live set often sound shaky. Who Knows sounds like your are either there at the show or listening to a recorded record. The visuals on this DVD are spectacular. I am not going to give away too much because this DVD is one you have to see for your self. It spans A.W.K's whole career from 2000 to 2004. Andrew also does the narration parts as well, which gives you a look into how personal this musical journey is for him. I would say that this DVD is the most important to have and get for 2006. Long live party music and Andrew W.K.
