

UFO 'TOO HOT TO HANDLE DVD'

(MUSIC VIDEO DISTRIBUTORS)

The legendary band UFO are a very underrated band, because they were as important as DEEP PURPLE and LED ZEPPELIN in the 1970s, but somehow are only really huge among the Rock community, because IRON MAIDEN and DEF LEPPARD were influences by them. However in the popular music world they are just like URIAH HEPP one of those bands that never got into the major league of rock, despite their songs were as good as DEEP PURPLE and LED ZEPPELIN. Anyway now there's another interesting DVD available, which concentrates on the band's early period, although stated it features material from 1969 right up to 1993, the 1970s are definitely the most discussed period on his DVD. The DVD counts 90 minutes and is built up around a documentary with interviews and live footage of the band. Interviews were done with long time members PHIL MOGG and PETE WAY, as well as members of DEF LEPPARD and IRON MAIDEN and onetime UFO guitarist MICHAEL SCHENKER. This all combined makes this a very interesting documentary, comparable to the recent THE SWEET DVD documentary which also had this kind of structure. Without a doubt, a must-have for any UFO fan or anyone who wants to check out a legendary Classic Hardrockband that should have been bigger. Available through:
