METAL'S DARK SIDE-Hard and the Furious V. 1:

From kicking it out with Cannibal Corpse to the final send off to Dimebag Darrell, this is a look at the underside of metal that most parents don't realize their kids are listening to. Hosted by Jasmin St. Claire, this is one high octane hour ride through the underground of the heartland, even if that heartland stretches from LA to Denmark. Mixing interviews and music, who says all docs have to play like they were made for "60 Minutes"? If the fun in this 'shocking' look at the metal underground whizzes past you, it's time to admit you're too old and move on rather than stand around and cluck your tongue.
