METAL'S DARKSIDE Volume 1 DVD

Rating: 6 stars

This new DVD series reminds me a lot of the metal head video magazines that were put out in the late 80's..this is basically a dvd that captures what is happening in the music scene right here & now, & it's hosted by a very cute porno star too! The Damageplan interview is the footage that every metal fan will wanna see, & the tribute to Dimebag is very touching! The Satyricon footage is very interesting & this is actually the first time I have ever really seen the band in this way. The Cannibal Corpse & Death Angel interviews are very in-depth, & I think that the editing, lay-out, & overall production of this dvd is really good! There's a few bonus clips on the dvd as well, but the prime footage on here is the Damageplan stuff, because this is actually some of the last footage ever shot of the band, & it's NOT to be missed! The cool thing about this dvd is that it's not very expensive...it's very low in price & I would consider this to be a dvd/video magazine that the metal fans will fall in love with!
