

POISON 'SEVEN DAYS LIVE DVD' (MUSIC VIDEO DISTRIBUTORS)

In 1986 POISON had a huge breakthrough in the USA with their debut album 'Look what the cat dragged in', with their hitsong "Talk dirty to me" becoming the ultimate 80s Partyrocker, even beating the likes of MOTLEY CRUE. However, fame was short in the POISON book, because in the early 90s the band was struggling and strangely enough were becoming more popular in the UK when they took on a rougher image instead of the Pretty Boy image of before. In fact, in the early 80s the band started as a Metalband, but the Hollywood scene turned them into Glamstarz, but in the 90s the band went into a sort of Bluesier direction with guitarist RITCHIE KOTZEN in their line-up. In 1993 they did a tour in the UK and one of these dates was filmed and now made available on DVD. The performance included here was a gig at the famous Hammersmith Apollo in London. 15 songs were played and can be seen on this DVD, which looks quite professional happily. The DVD only lasts 82 minutes, so a bit short, but nevertheless the performance was quite good, owing thanks to RITCHIE KOTZEN who replaced the very average CC DEVILLE in the early 90s POISON line-up. So no extra bonus footage, but when watching the DVD you definitely have a good time when seeing classic POISON tunes like "Talk dirty to me", "Nothin' but a good time", "Look what the cat dragged in", "Unskinny bop", "Ride the wind" and "Fallen angel". Must-have for POISON fans if they are still out there! Available through: <http://www.mvdb2b.com>
