These guys are somewhat legends of the Polish heavy metal scene and have been kicking ass for over 25 years. This DVD is exceptional. The show is energetic, the guys are in their best form, and the audience is enthusiastic. The songs may be in Polish and the spoken parts may be in Polish but there are English subtitles for the spoken parts. The one outstanding thing is the music and the passion and the delivery. The DVD makes you wish you had been at that show. It was filmed at Metalmania 2005 and there are so many cool things on this DVD. You get numerous live videos, several videoclips, and of course interviews with some of the band members in Polish but with English subtitles. All in all it's an awesome video and it doesn't matter to me what language music is sung in. Music is a universal language and I highly recommend this DVD for people who love heavy metal no matter what.
