

**LANDMARQ 'TURBULENCE: LIVE IN POLAND DVD'
(METAL MIND PRODUCTIONS/MUSIC VIDEO DISTRIBUTORS)**

By far the best DVD releases are coming out of Poland, where METAL MIND PRODUCTIONS has rapidly become the best DVD release label for progressive rockmusic. The latest addition is a DVD of the UK band LANDMARQ. The featured concert on this band's 155-minutes counting DVD was performed in the same theatre as ARENA (which was the Wyspianski Theatre in Katowice/Poland), in November 2005. The band's tight neo-prog sound mixed with the beautiful vocals of female singer TRACY HITCHINGS make them sound quite different, sort of a mix between IQ, HEART and LANA LANE, with a bit of RENAISSANCE as well, so neo-prog with some aor and pop elements to make the sound sometimes catchy and melodic, while at other times pure prog in the instrumental department. Besides the concert, other footage include bonus videos from older performances (as far back as 1993 when they played a gig in Uden/Holland) as well as footage from Progfarm performances. There is even a bonus audio section with unreleased songs, so what more do you want, as this is pretty much a perfect neo-prog DVD. Available through: <http://www.mvdb2b.com>
