Wake Up Screaming A Vans Warped Tour Documentary

MVD

Another fine addition to the Warped Tour DVD Range...

With several titles out from previous tours, it's become a delight waiting for the next tours visual documentation. With a line up that boasts legendary bands, up n coming hot-tips and whatever bands are currently ruling the punk roost, all placed at random times (decided on the day), and generally propped up by a worthy charitable cause and plenty of festival bonding, it's like going through your best friends holiday pictures, wishing you were there and cursing everyone else who was there. Featuring live footage galore from the likes of Hawthorne Heights, Story Of The Year, Silverstein, NOFX, S.T.U.N, Strike Anywhere and Bleed The Dream as well as plenty of backstage stuff. With plenty of PETA related material included, it's a treat for all, though one criticism would be that compared to previous releases you feel somewhat short changed due to the low number of live performances contained, and the whole story behind the festival has been played to death now - but still a worthy purchase for punk fans!
