

GENITORTURERS

Live In Sin DVD

(MVD Visual)

by Chris Forbes

I wish this had been from one live show, but it is taken from several. With that being said this is still a cool DVD. The band put on a hell of a live show complete with props and naked girls and as a guy that wasn't a bad thing in my book ha ha. Some of the camera work I wish was a bit better as they have too many close up shots and they don't stick to shots too long. The band do sound tight and they come across as a must see live band and more than give you your money's worth. Extras on here include a cool mud wrestling clip and some more nude woman ha ha. Info:
