If you're a punk rock fanatic, you know that Flipper are the kings of the underground..they never got much respect, & infact, most people that listen to the mainstream rock crap that media force feeds you, they don't even know what Flipper was all about!! Flipper was a passionate punk rock band..they didn't lool like the Sex Pistols..infact, at times, they looked more like Frat Boys, BUT, their music was about social change, fun, & they had a sense of humor, yet they also had a message, & the bands got a new dvd out via MVD that captures some amazing performances from the band! "One By One" is the best song to choose if I had to pick one song that described the band as a whole..it's NOT polished, it's rough, it's raw, & it still has heart! The videos on here reflect the era in which is was filmed..the 80's were not known as the "technological" era in terms of video camera's, so watching this dvd, it's like watching old home movies at times & that REALLY reflects the truest vibe of Flipper!
