

PENDRAGON/And Now Everybody To The Stage DVD (Metal Mind Productions)

I tell you, Metal Mind must have the best camera crews in the world as every DVD the camera work is godly. This band play sort of progressive metal, but in a more emotional and with a bit more feeling. Bands like the newer Yes, Asia and the like came to mind as they played. The singer is a really cool front man as he has a great personality and the songs flowed quite well on this. You get a 15 song concert and some extras like photos, interviews, etc. I had never heard the band before this and I am now a fan. The music is great and the DVD is even better.
