

GG Allin
"Hated"
Special Edition DVD
2007
MVD Visual

I had always heard the name GG Allin, but never really knew what he was about, all I knew was that he did some wild things on stage, well this DVD "Hated" gave me a complete lesson on this man. This documentary was actually finished just before his death, for those that don't know, GG Allin died of a drug overdose following his show. the DVD was shot by Tod Phillips, an Academy Award nominated writer and director. this DVD takes a look at how GG Allin thought, acted, and what he believed in, he believed that Rock & Roll should be dangerous. there are interviews with GG, Merle Allin, his brother and bassist for the band, and some fans talk about him. there is live footage of GG taunting the crowd to hit him, he blades himself, defecates on stage, among many other things, this is a no holds barred look at this Rockstar which some call a madman, and some call an artist. this is a great DVD to have in your rock & roll collection.

Bonus Features: special poster offer-John Wayne Gacy's portrait, GG Allin temporary tattoos, rare interview with GG's mother, and music videos.
