Out Of The Shadows DVD

(MVD)

by Chris Forbes

I had never heard this band's music before only that Lemmy from Motorhead was into them. Well, after watching some of this I can see why. This band is really spaced out and really play some fucked up music. They are metal, but like a Pink Floyd version of metal and I can see a hint of Motorhead here and there. This band sounds like no other and the cameras work and sound is excellent on this too. Almost 2 1/2 hours of music and stuff and after watching some of this I am a fan of the band as they won me over with the originality and performance. Info: <http://www.mvdvisual.com>
