Comments: This isn't really the story of Mission of Burma, Boston's most famed art-punk band -- it's rather the story of the band's triumphant reunion, 19 years after its final gig. Consisting mostly of recent footage taken during the band's reunion tour and in recording sessions for its reunion album, it does also feature some historical footage of Burma's early-80s heyday. This DVD will mostly be of interest to the band's fans, rather than to those whose interest in the time and place is more academic. (RA)
