The Mission of Burma Story

(MVD Visual)

The Mission of Burma is another band that you never heard of that reunited after 19 years apart and rocked out on this DVD as if it'd never gone away. The legendary Boston trio was a group of rambunctious noisemakers influential to many who have followed. As the liner notes so rightly state, "they're the band who started the whole loud-quiet-loud buzzsaw pop thing that begat Husker Du, who begat the Pixies, who begat Nirvana." Interviews, backstage action, and the famously feisty Mission of Burma live performances galore.

**Extras:** Archival performances and interviews.
