

FILM FANADDICT

Mark Jason Murray

Music Video Distributors continues to release a large number of quality DVDs for hardcore music lovers. Here's a look at several of their latest releases of interest.

Three great death metal releases from Metal Mind Productions will be essential purchases for fans. GRAVE – ENRAPTURED, OBITUARY – FROZEN ALIVE and SINISTER – PROPHECIES DENIED are all great concert releases. All three were shot on August 24, 2006 in Warsaw, Poland, providing death metal fans with an amazingly brutal day of music with each band covering tracks spanning their entire careers. The production quality on each of these discs is identical, with excellent widescreen multi-camera footage and high quality audio that would also make for a great live CD release for each band. A 5.1 surround sound track is included on each release yet sounds a little bit hollow, bringing bass levels up and guitar/treble down so it's recommended to stick with the stereo tracks on each of these. All three of these bands are veterans of the genre and provide great performances clocking in at an hour or more (Obituary does over twenty songs!). These titles don't skimp on the bonus features as each includes lengthy career spanning interviews with the bands, bonus videos and live footage, biographies, discographies and much more. This is high quality stuff and I hope Metal Mind produces more titles rivaling these in the future.
