This is a 2004 concert from this band and what a concert it is. The band rips through a full 23 song set with material from almost all of their releases. The sound and camera work is superb and you almost feel like your in the front row. The band also sound tight as f_ck and this will please any fan of death metal. Extras includes more videos, interviews with the band and other goodies. Info: <http://www.musicvideodistributors.com>
