This is a DVD of some kind of tour that goes on over in Europe that looks similar to the Van Warped Tour that we get over here. There is a ton of bands on here and skate boarding stuff, etc. Me personally I am not into skate boarding and most of the bands weren't my cup of tea as they are that style of hardcore with all that groove stuff and to me ever band sort sounds the same after a while. If your into bands like Pennywise, Anti Flag, and Autumn to Ashes you'll love this, but is just not for me as skate boarding punk doesn't fit in with me. Info:
