If you've ever wondered what's the big deal about '60s folk icon Tim Buckley -- father of '90s-rock enigma Jeff -- "My Fleeting House" (MVD Visual) should enlighten you. This documentary runs chronological footage of Buckley in performance from 1967 to just before he died, at just 28, in 1975 from a lethal combo of heroin and alcohol, with informative, intimate recollections from Buckley's musical collaborators and biographer, David Browne. Despite a hauntingly perfect voice, Buckley's earlier baroque folk-pop seems staid and is eclipsed by his beguiling later avant-garde jazzy works: Buckley soul-searching on "I Woke Up" is mind blowing.
