V/A-Hip Hop Time Capsule: The Best of RETV 93- MVD

So what is RETV anyway? I had no idea, probably because I grew up in Chicago and this sort of seemed like a cable access show focused on Rap Entertainment that was out of New Jersey. However, the focus of this DVD was indeed a weird, transition period in the world of hip-hop, 1993. Right before Snoop Dogg hit it big on MTV and just after the movement of bands like NWA and The Geto Boys was this period of underground hip hop. This DVD provides a nice look at a scene featuring Redman, Dr. Dre, 2 pac, and many more. With looks at videos, live performances, and clips of RETV this DVD gives you a look at a show that you most likely never even knew existed. I am a punk fan at heart and the scene strives on the underground, and after watching this I think it is safe to say so does the hip-hop scene. Great DVD and well worth a watch. (JK)
