A Night Of Ferocious Joy Music Video Distributors

This **DVD** is history in the making and most people don't even know it. Filmed on Mother's Day, 2002 during the **ARTSPEAKS! NOT IN OUR NAME** concert, it is a time capsuled document in itself. Rewind to 2002 and you may remember the tension that was, and still is, in the air. The **War on Terror** had just begun and many people began to voice their feelings on the war, and **President Bush**.

One of the first concerts ever staged in protest to the war on terror was the **ARTSPEAKS!NOT IN OUR NAME** concert, held at **The Palace Theater** in **Hollywood**. The line up included **Blackalicious, Saul Williams, The Coup, Dialated Peoples, Ozomatli**, and many more. This DVD is a great chance to see a ground breaking show, dedicated to raising awariness of one of the most critical issues of our time period. The fact that this was the first concert of it's kind shows just how powerful and innovative the hip-hop nation can be.

I highly recommend this DVD for the performances, and the message behind it as well. Cop that when it hits stores **September 13!**
