focused mainly on acoustic styles, playing flamenco and tango music on classical guitar. *Consequence of Chaos* is being billed as his return to solid-body electric guitar, and his fans will not be disappointed: if anything, his time in the acoustic wilderness has only honed his chops and expanded his harmonic sense, while bringing a new multicultural flavor to his compositions. This album finds him playing both electric and acoustic instruments, and he's accompanied by an all-star cast of supporting players that includes drummer Steve Gadd, pianist Chick Corea, bassist John Patitucci and many others. Recommended. (RA)

Comments: This collection of jazz footage offers no introductions, no context, no commentary -- just live filmed and videotaped performances by such legendary figures as Bill Evans, Thelonious Monk, Duke Ellington, Keith Jarrett and Jimmy Smith. It's part of a series of such collections with West Coast and East Coast themes, and while the content itself is a treasure trove, the lack of liner notes may prove frustrating for some users. Recommended to all libraries supporting a strong jazz curriculum. (RA)

Comments: Cure fans can argue endlessly about which of the band's 1980s albums are best, but I think I'd put *The Head on the Door* very near the top, just under their wonderful debut. Weird but pop-smart where previous efforts had just been weird or depressing, this one brings together everything the band did best in one handy (if slightly too compact) package. The compactness problem is solved with this deluxe reissue by the addition of 18 tracks of demos and rarities. In other words, Rhino does it again. (RA)
