

RELENTLESS/Tempest Of Torment (Arctic Music Group) This while not very original is some serious fast, blistering death metal. The band just rip and tear through each tune with the fury of a charging bull. I love the guitar and drum sound and those wicked fast blast beats just tore through me. The singer has a very good death metal voice and the production is not over produced and is right where it needs to be. Think Incantation meets Immolation and mix it in with Canibal Corpse.
