A premier producer of both 'time-lost' and contemporary music CDs for personal and library collections, MVD Audio has now made available "The Fall: Live At The Knitting Factory", a recording original made in Hollywood in 2001 and previously only available on the DVD Access All Areas. The band performs a number of Fall classics and documents one of the many different line ups of Mark E. Smith's popular and influential group. A superbly produced recording that takes full advantage of CD technology, "The Fall: Live At The Knitting Factory" is a 'must' for the legion of their enthusiastic fans and a welcome introduction for those who have not yet encountered their music. Also very highly recommended listening are several other new CD releases from MVD Audio including: The British group Attrition's "Esoteria: A Collection of Ambient and Classical Works 1982-2004" (4GodsCD) and "The Attrition of Reason" (5GodsCD); Paradiso' "Tangerine Dream" (EGVP101CD) which is the third installment of the music based on Dante Alighieri's 'La Divina Commedia'; the British Group Gentle Giant's "Live in Santa Monica 1975" (Glass109CD); and Refugee's "Live in Concert: Newcastle City hall 1974" (VP421CD). Music enthusiasts, librarians, and collectors are encouraged to visit the MVD Audio website at www.mvdb2b.com for a complete listing of all of their available albums.
