"THE LIFE AFTER DEATH PROJECT is a great documentary on a timeless theme. It is a fascinating film and a true-life enigma that begins with one small, odd incident and mushrooms into a huge, scientific investigation of apparent messages from the 'Other Side.' It is also the first "paranormal bio-pic" - the Afterlife Story of Forrest J Ackerman, a founding father of Hollywood science-fiction who refuses to rest in peace..." -Pete Hammond - Movieline

A mesmerizing CSI-caliber quest for proof of life after death. Four New York Times best-selling authors, three top science professors and three well-respected mediums make a leap into the unknown, investigating astonishing evidence in the case of apparent "After Death Communication" (ADC) from Sci-Fi luminary Forrest J Ackerman. We journey from spiritualists to skeptics, and from chem labs to ground-breaking computer software that may enable communication between the living and the deceased.

Author Richard Matheson says Forry Ackerman was an atheist who did not believe in life after death, but Forry told close friends if it turned out he was wrong, he would drop them a line.

He passed away on December 4, 2008. Here's "the line" we think he dropped to the director of this film, his long time friend Paul Davids. The ink has been scientifically tested by top chemists at Indiana University and the College of New Jersey. After 3 years of study, the chemists are convinced it's very strange and science has yet to explain it.
