On home video February 19, in the tradition of *Tremors* and *Sharktopus* comes the newest entry in the annals of rampaging monster movies. **Snow Shark: Ancient Snow Beast** tells the story of a small town terrorized by a prehistoric creature and the fearless citizens who defend it.

"In 1999, a team of animal biologists investigating a rash of wildlife killings disappeared in the lonely woods near a small town. Years later, a local resident claims to have killed a prehistoric carnivorous creature living in the snow. Now, someone – or something – is making lunch of the locals.

As curiosity-seekers and crypto zoologists descend on the small town, drawn by the legend of the Snow Shark, Mark – sole survivor of an earlier attack – leads an armed and dangerous posse into a deadly battle.

Dive into Snow Shark, the outrageous and spine-tingling tale of the world's greatest predator, frozen for thousands of years, freed by an earthquake, and really, really hungry."

The DVD is presented with behind-the-scenes material, short films and outtakes.
