I knew that Germans could play Rock, Prog, Classical music... but I did not know they could play the Blues in such a convincing manner. **The Blues Company** is one of Germany's oldest and most successful blues band, and I can easily see why. The material on this DVD is original (no standards), written by members of the band and sung in English. The performance is incredible, it's just like listening to a great American Blues Band at the top of it's form. Only the in between song interaction from the band to the crowd breaks the illusion.

The sound and filming on this DVD is of the highest quality level that can be expected. If you are a lover of modern Blues/Rock this DVD is sure to knock you off your feet. Highly recommended.
