Live In Jakarta DVD

Review by Gary Hill

I'd never heard this jazz outfit before getting this DVD. This is an impressive group and this concert really shows them off well. While the music is vocal in nature – and we get some cool vocal performances, the music is perhaps akin to Spyro Gyra – but perhaps more funky. The videography is good and all around we get a killer performance from a talented bunch of musicians. I'd highly recommend this to all fans of vocal jazz. I know I'm going to be on the lookout for more from this group in the future.

SPOCK'S BEARD is regarded as one the greatest live bands in the Progressive Rock scene today. Any attendee of a "BEARD" show would agree that they truly are Prog Rock masters.
