

ROBBEN FORD/In Concert DVD (Inakustik) This is an awesome jazz guitar oriented DVD. This guy can play some wicked licks and I love guitar jazz and this DVD was right up my alley. The music is long a times and jammed, but it played with such soul and feeling that I canÖt help but get goosebumps. The camera work is top notch and the 9 tunes here, not a filler in the bunch. Robbie seems to be happy up there playing and really gets into what he is doing. Info:
