

# METAL CORE FANZINE

MICHAEL SCHENKER /Temple Of Rock (Inakustik)

I am a huge fan of UFO and esp of the stuff with Schenker so I was looking forward to popping this baby in. The music is pretty much what I expected with some just some solid hard rock with a singer with a nice set of pipes. Michael shreds on this with that exploding guitar sound he has and the tunes had my neck moving by the 2nd song. 13 tunes of this disc and all are just solid hard rock tunes and none of that modern rock shit, this is solid CLASSIC rock the way rock should be. There is also track # 14 which is a 3 generations guitar battle that you will have to hear for yourself. Michael Voss is the singer on this and his vocals are great and fit the music quite well. I was not let down in any way with this and any fan of rock or UFO will love this.
