

Marillion- Somewhere Else

I've been following this band for over 20 years now. They mutate and change from time to time. Some of their albums are awesome. Some are just okay. This one falls into the okay category. It has some good songs, but nothing that grabs me the way a lot of their music does. If you are not familiar with them, I suggest you start with their last album "Marbles" or their 1994 concept record "Brave." It's rather trippy in places. You may also go back farther to when they had a different singer, a huge Scottish guy name Fish who wrote great poetry. Also, check out "Misplaced Childhood" or, for the lonely alcoholic, "Clutching At Straws."
