Marillion- Somewhere Else

by Jenna Leonard

May 2nd, 2007 Singles and albums

It seems that Marillion's latest effort is rather aptly named *Somewhere Else* because that's where they sound like they want to be, more specifically they sound tired, like they want to be in bed with a nice warm cup of cocoa and an electric blanket. They've spent most of their career using notebooks they found in Genesis' bins to make music, but that tit Collins can manage to put in a little more effort than this.

For a modern comparison, *Somewhere Else* lies somewhere between Richard Ashcroft, Starsailor and Keane's 'rocking' last album (What? It had guitars and everything) and probably has middle ages people in chinos who secretly still covet an old sleeveless denim jacket with a beer towel sewn on the back that they've not worn for twenty years, creaming themselves. Sorry, there would be more but I've fallen asleep.....
