Swings undisputed master, Duke Ellington, created a legacy that still resonates today and yet, the masters works seem to be remembered more when in the possession of someone else. Covered to the hilt, and with the great man now gone it's a real wonder when gems like this pop up at the most unsuspecting times. Featuring 21 tracks (plus 4 bonus tracks) of the master armed only with his orchestra, this is a joyous romp through the masters bag of hits and swings - With a masterful sound and a visual quality that doesn't seem right for it's date, this is a package you can swing through the night for!
