

**Ananda Project - *Fire Flower* 3/3**

O's Notes: They start "Space And Time" with club beats and airy smooth vocals. It's a trip back to the days of disco in some respects. Chris Brann is the master and creator of Ananda Project. He writes the music and plays keyboards. He gets help from a number of featured artists. The vocals come from Heidi Vogel, Terrance Downs, Avery Sunshine, Heather Johnson, Kai Martin. They settle into a refreshing groove on "Free Me" that gets even better on "Fireworks" before returning to the club groove on "Stalk You".
