NOISEHUNTER/Spell Of Noise (Karthago Records) Ah more killer power/heavy metal from these guys and there is 9 bonus tracks on this puppy. Just killer riff after riff. How in the hell did I miss these guys the 1st time around. Vocals are great and aggressive and they don't even sound like any band they sound like themselves and this band just delivers the goods song after song and if your into 80's power or straight forward metal you will go bonkers like me over this killer band. A must have. Info:
