Malfini (Robert Ambrose), a sleazy porn producer nobody has ever heard of, offers 7 porn actresses (Shelly Martinez, Naomi Cruz, Kasey Poteet, Cassandra St. James, Shirley Harper, Lynette A. Nechayeva, Liana Mendoza) tons of money and top conditions to appear in his film. The girls all feel rather let down when they arrive on set and find it to be a run-down warehouse, but hey, the money is right, and Malfini is charming enough to give all of the girls the feeling they're going to be his next big star.

Thing is, there is a brutal killer roaming the warehouse, aptly called Brute (Dirk Vader), and he kills these porngirls backstage one after the next after the next after the next - and quite brutally so, mind you.

But how come, I hear you ask, a porn producer doesn't notice his girls disappearing one after the other during the shoot?

Because he actually shoots a snuff movie. Now before you jump to conclusions though, he's not the main villain of the plot, he's just a businessman who has been hired for the job ... just like the girls were hired by him. But if he was only hired like the others, could it be that Brute eventually also turns on him?

Yup - and suddenly he has to rely on the one porngirl (Shirley Harper) clever enough to see through his charade to get out of this alive. Too bad then that that girl has the only gun in the building, and that she is quite a bit miffed at him for having treated her like cannonfodder ...

Porn Shoot Massacre is one of the films that actually delivers what the title suggests (well, apart from explicit sex at least): There is plenty of nudity, there's girls getting killed quite brutally, and the film follows the slasher formula rather nicely ... and yet, the film is one of the more entertaining slashers of late, for one because it's completely unpretentious, plus it doesn't take itself seriously at all without being moronic, and it's actually well-paced too, also showing a good balance between tits and gore.

Now all of this obviously does not make **Porn Shoot Massacre** the next **Citizen Kane** - but a great party movie at least!
