Attrition - "Esoteria" CD - Subtitled a 'collection of ambient and classical works 1982-2004', you already have an idea of what to expect here. That said, this is may be some of Martin Bowes' most timeless and mature work yet, which is amazing as some of it dates back as much as 25 years! Strong showings include the chilling 'Nine tails, to follow you round', which uses haunting piano and electro-acoustic sound to glorious effect. 'Cold Genius' is a classical study for strings, and 'Have a nice time' splices in children's voice samples for a ghostly, otherworldly experience. If dark soundtrack work interests you, this collection from the vaults of one of England's premier electronic acts will satiate that need. Superb! (Two Gods/Voiceprint)
