

JOHN WETTON/Agenda (Metal Mind Productions)

This is a live recording from John. John some of you might remember was in Asia, who are actually back together. Anyway he does play some older Asia tunes (Sole Survivor, The Heat of the Moment) along with some of his solo stuff. The material sounds good and John's voice still sounds good and the band he has backing him more than do the job.

The production is good and any fan of Asia or good rock n roll, would want this.
