ATROCITY/Todessehnsucht (Metal Mind Productions) This band had been around for a bit and in their time released some good stuff and some not so good stuff. This is the good stuff. This is another re-release and is solid death metal played with speed and conviction. The production is bottom end heavy and the guitar sound is thick and heavy and didn't sound like a lot of the older death metal bands and the vocals were a one of a kind deal too. This will grow on you and if you like well played death metal or if you missed this on CD the 1st time around, here is your chance to get some great music.
