Rating: 6 stars!

Diamond Head have always been considered by the true fans of the NWOBHM as the most influential band of that genre, next to Iron Maiden...Diamond Head's biggest fans though are obviously the guys in Metallica who made the song "Am I Evil?" famous & interestingly enough, alot of the Metallica fans still think that's a Hetfield penned song, when infact, it's an old Diamond Head song off their "Borrowed Time" cd. The "Borrowed Time" & "Canterbury" cd's have recently been re-released in a limited edition digipack version that's limited to 2,000 copies worldwide, & when you listen to these 2 cd's, the band really did create great heavy music & the era that they came from was NOT particularly known as an era for heavy music in popular culture! Both cd's have cool little biographical stories about the band & the music sounds superb & rich! It's interesting to hear the band play, because they have a really heavy sound, BUT, they also have a blues side, & they mix up genre's quite well while still remaining hard & heavy!
