CRIMSON GLORY/Transcendence (Metal Mind Productions) This is the 2nd album that originally came out on Roadracer and is now being released by Metal Mind. This is another great power metal release as the band continue on where they left off on the above release as this is chock full of more killer power metal that doesn't rely so much on speed as they just rip out and crank out killer riff after riff. The vocals again are a love/hate thing as I remember some people loving his vocals and others hating it. Years ago I hated his singing, but now as I am older, this isn't bad and like I said before, this blows away all of these new power metal bands for sure. Info:
